BRINGING IT ALL BACK HOME

The new La Marzocco Linea Mini is ready to go home with you! Fresh off winning the Best New Product Award and People's Choice Award (for coffee or tea preparation and serving for consumers) at the 2015 Specialty Coffee Association of America (SCAA) Event in Seattle, the Linea Mini comes equipped with a dual-boiler system that allows for consistent brew temperature and steam power. The machine is optimized for the home with a built-in water reservoir and standard-appliance-power needs, allowing the user to plug and play. Linea Mini is countertop friendly with a footprint of 14-inches wide by 21-inches deep, and comes in four finishes: stainless, red, black, and white.
